

KEY FEATURES

- Adjustable louvre window system designed to complement the Vantage Designer Series windows and doors. The jambs, head and sill will clip to all Designer Series products.
- The 131mm wide frame allows a flyscreen to be fitted within the frame line without the need for screws, rivets or unsightly turnbuckles – giving a clean flat finish.
- Standard blade heights are 152mm and 102mm, choosing a frame size which allows you to use all full height blades will always give the best appearance (i.e. no need for blades to be cut down).
- Will accept glass, timber or aluminium blades.
- Fixed inlay adaptors make it possible to have adjustable louvres and fixed lights within the same frame.
- 3° fall in sill ensures water, dust and salt are guided out of the window system.
- This window is available with an optional built-in security bar system.
- Louvre mechanisms can be key locked.

Our louvre mullions have been designed to withstand high wind loads and have a recess on the outside to accept screens when required. Image above shows how we fit fixed lights into the frame.

Vantage LouvreMASTER™ frame can be coupled to any Designer Series door with a large range of custom snap-on couplers. The picture above shows the louvre frame coupled to Series 618 Sliding Door.

We offer 102mm and 152mm aluminium blades. Each blade is fitted with a weather seal where the blade meets blade. Blades can be coloured to match main frame if required.

One of the most important features with Vantage LouvreMASTER™ windows is how the flyscreen fits neatly into the window frame.

GENERAL

Max Frame Height*
3014mm
